

Konichiwa!

Okochi,

Am glad once again to extend my sincere greetings to you. This is the essay about my life in Uganda.

My past, present, and my future dreams

Midian's past life

I come from Kisoro district south western Uganda, I was born in a village called Murora, joined Mukibugu Primary school for my primary one studies in 2003 and graduated my primary seven in 2009, I was one of the blessed students in that real school that got a chance to study in a very good boarding school called St Gertrude's Vocational school.

Before secondary, my primary life was always accompanied by a lot of work at home, I used to fetch water every day, go for weeding every day and wash clothes for my siblings and my mother and cook food every day.

In 2013, I completed my s4 at St Gertrude's vocational school.

Midian's present life

From St Gertrude's, I joined [Kigezi High School](#) in Kabale. this is a school I couldn't dream of according to my family background , the school is very wonderful with nice teachers, good buildings ,good looking compounds ,loving students and everything good and nice on my side as far as academic studies is concerned. I enjoy it!!!!!!!!!!!!!!!!!!!!!!

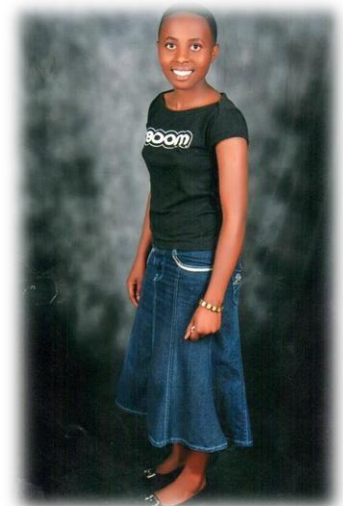

When I was still in Primary, water was a big problem all over but when I joined secondary school especially Kigezi High School, everything changed and life completely became different. I am so much inspired by the way successful people live in the world especially the old boys and old girls of Kigezi High School are professors ,lecturers , professional teachers , member of parliament among others , and this inspires me so much .

At school , Kigezi High School I eat good meals which I never saw at home before for example; meat every weekend, rice, milk ,peanuts, sweet potatoes, posho (maize flour + water), beans. This is a life that "I Midian "wouldn't expect to live , it's just beyond my thoughts and this inspired me so much that I should work very hard to live the best life in the world .

Midian's future dreams

It is always my big wish to become a professional teacher experienced and focused teacher in the fields of education .I still widen my thoughts to become a senior lecturer at a university, I have always dreamt of studying from an outside university which I think I can be exposed to different kinds of peoples' lives and compare between Uganda and other countries like Japan. More so, I have always dreamt of seeing, understanding and analysing about other students' or children's lives in other countries and see how they live .I have always thought that it can expose me to the world of intelligent people and inspire me so much to become a great person in the world in future, I greatly dream of becoming a very great and responsible lady who will even be in to help other people especially children who suffer out of poverty. It is always my prayer that at one time I see my dreams come true.

Thank you for listening to me.

Sincerely,

Midian Cyimpaye.
